

From what I understand, is that Selldone Business OS with Community Builder (Advanced) has a lot of what it takes to start with Community 1st & eCommerce 3rd... COMMUNITY.BUSINESS 2nd. And what seems to be the most important part to Start, is a Copy/Content Make-Over, meaning the Positioning.

You may have already figured that out.

Do you agree with this?

Some questions:

For custom domain: Do you have multiple IP-addresses at your disposal, meaning that you do not use only 1 ip-address for all your Clients' Selldone Sites?

If answer is yes, do you also have dedicated ip-addresses... one ip-address per Selldone Site... for Enterprise Plan especially, perhaps only for Enterprise Plan Selldone Sites?

Momentarily We couldn't check to see if ip-address you used in your tutorial, is another ip-address than the one that was mentioned to set custom domain when we had an account at selldone.com.

At Siteground, We had option to order a dedicated IP-address, as not using a dedicated IP-address could be a bottleneck related to visitor traffic.

And that's also Google Cloud Platform at Siteground.

Are you there, Allison?

As long as its Static content, browsing a store, most can be done via cache via Cloud CDN. When it comes to ordering, this is dynamic and not via cache and would be via the server where that database is hosted. Probably not foreign language.

Same goes for Community Interaction: Posting, Commenting etc.

Concerning an earlier e-mail to Mehrdad & Alireza,

We believe that may like to have some clarification about this:

The message was as follows:

Onderwerp: Fwd: Re: IMPORTANT: Concerning an earlier chat message to Allison from Selldone

Datum: 2024-03-21 14:17

Afzender: "Michael Roeten @ PEOPLE.FAMILY" <michael@people.family>

Ontvanger: Alireza Shirdel <alireza@selldone.com>, <mehrdad@selldone.com>

Greetings,

You may think... they can connect via Social Media and mention their store.

Yes, and Social Media is overwhelmed with all those mentions.

So, what would Our approach be for Clients, if they have a Home Base at 'Friendlyn™'?

Let's talk Alireza & Mehrdad.

===||===

So, Let's talk, Mehrdad & Alireza:

As mentioned before, We checked if livingroom.com was available (We did not give that much chance), and it wasn't.

However, Living Room is part of a Home.

So, even though that domain name was not available, doesn't mean We can't use 'Living Room' in Our Approach.

Like this:

<https://friendlyn.com/livingroom/client-site>

As far as approach, We believe it's important for mentions elsewhere (which We'll come back to later), that it radiates trust. Some domain names mentions, to click on it, hmh... not very likely many will trust a foreign domain name which doesn't address the security concern.

For example, if someone wants to share a video to an acquaintance and it starts with [youtube.com/.....](https://youtube.com/) That addresses the security concern enough. Youtube is mainstream known as the Big Video Site of Google (of Alphabet Inc.).

So, friendlyn.com and living room may address security concern enough that when URL is eventually mentioned, a click is more likely to follow, than with a fussy name.

Especially when Friendlyn as an ExchangeWithFriends Platform becomes more mainstream, however to begin with, We believe friendlyn not only addresses the security concern, it also addresses curiosity, when eventually mentioned to infuse interest to find out what that is about: a living room at friendlyn from this person which has been so supportive, so selling-detached.

So, selling-detached is Key, and Eleganthe™ Members, whom believe HumaneDynamics™ Some Principles, had to overcome Fear/fear, being given THE HOLY SPIRIT (SPIRITUAL REALM).

To set-up and manage a Living Room at Friendlyn™, is for Eleganthe™ Members, so selling is not priority, attaining PEACE is Priority.

Before Community System: COMMUNITY.BUSINESS™ was Invented in August 2023, We had a previous System set-up at unitedholland.com for Our Company UNITED HOLLAND.

We had set that up and went on to focus on <https://people.family>, which was a live site at that time and was later integrated with <https://community.business>. <https://people.family> is momentarily mapped to <https://community.business>

That previous System was about healing The Internet from undesirable content.

It was about UNITED HOLLAND Members, if that System would have taken off back then, to surf the internet from sites listed in SERPS of Google, whom had an email-address &/or contactform at their site and try to be friendly neighbours, by reviewing sites, create an approx. 1 minute Youtube initial review video with suggestions. And if owners of these reviewed sites would be interested in more, they could order further review at unitedholland.com

This approach is what Eleganthe™ Members, with a Living Room at Friendlyn™ would do for Outreach. To be Genuinely be interested in other people. Not to try to push their Living Room (with initially 'hidden' store) URL (at Friendlyn.com) to them, however to mention it in their sig, after they made contact by giving them some review the site owner may chose to use free of charge.

~ EMELINE

If an Eleganthe Member, whom was given THE HOLY SPIRIT, becomes like an Elder, their Living Room may be upgraded to Lounge (fitting a Larger Home).

They could provide some leadership (under Us) to fellow Eleganthe Members and would ideally take work load of 'Our Hands'. ~ EMELINE

So: <https://friendlyn.com/lounge/client-site>

Hey Nick, may you be doing well
