

Greetings Julie,

May you be doing Well.

While this is not directly about Generative AI, it Very Well is about People.

You have not seen a tech revolution like generative ai in 30 years... What you may already know, is that it does not directly add to more Job availability, for the approximately 60% employable people, whom were recently reported unemployed. And Job availability with Creative and 'Living' Wages Jobs. So, no more call center Jobs, who needs that.

So, We don't live on the Internet or the Metaverse could potentially provide many Jobs, with above mentioned: Creative & 'Living' Wages.

Julie, Accenture may become the Company to join with & enable Us to start a Professional Revolution, not seen ever since Adam & Eve probably. And, IT & Internet and last but not least: HumaneDynamics™ make that possible for The Public Community.

So, lets talk about Our Invention, or call it BOON from an Immens Ordeal We experienced.

It's called: Community System: COMMUNITY.BUSINESS™ and it's NOT non-profit, neither Government Political, however it is Trade Business.

We would like Accenture (perhaps with Capgemini/SAP) to build an IT-/Transaction System for this Community System. So The Employable Public Community may All have Creative 'Living Wages' Jobs.

In exchange We offer Accenture chance to become UNITED HOLLAND Elegant.Partners™ and Publivity™ C.S.R./Excellentor Members. Besides An IT System, We ask a fee from Accenture, which is ±25% of Regular fee. In case of Accenture that would be ±\$1B instead of \$4B.

More info: <https://community.business> & <https://unitedholland.com>

We know that We already contacted Accenture via contact form at [accenture.com](https://www.accenture.com), however there was an issue going related to that contact form and were unable to sent a follow-up message.

So, following-up this way via LinkedIn seemed appropriate, as we have approached Aiman Ezzat & Christian Klein via LinkedIn too.

We invite you to come to The Netherlands(, UNITED HOLLAND) to talk Community Business.

This time of the year it's quite Dutch here, however Multi-cultural too. :)

Looking forward to your response, Julie,
Cheers,

Michael Roeten
